		Right Hipped	Right Side Hipped

**Don't forget every one of the 280 styles available can be further modified to suit your customers requirements. Overall width, depth, bay width, wing depth/width, rafters, panels, facets, roof vents and so on can all be adjusted. You can even use the unique but very powerful 'roof cut-out' tool to alter any conservatory design to accomodate for chimney breasts and a whole lot more besides..**
